PROFILE

Software Engineer with **4+ years of experience** building and owning **production systems** — from multi-store ecommerce platforms and CodeCanyon SaaS products to **large-scale, multi-tenant enterprise software** serving **100+ clients** and processing **millions of records daily**. At Sokrio, progressed from full-stack feature development to **architecting distributed microservices**, leading **frontend modernisation (Vue.js → React.js + Next.js)**, building **Python-powered analytics APIs**, and managing **deployment infrastructure** in production environments. Experienced in **mentoring teammates**, establishing codebase standards, and contributing to engineering decisions that affect the whole team.

SKILLS

Backend	Laravel (Expert) · Node.js · Python · PHP · RESTful API Design
Frontend	React.js · Next.js · Vue.js · TypeScript · JavaScript
Database	MySQL · MongoDB · Redis · RabbitMQ
DevOps	Docker · AWS · CI/CD · Linux · VPS Server Management
Architecture	Microservices · Multi-tenant SaaS · Event-driven Systems · Modular API Design
Tools	Git · GitHub · Postman · PHPUnit · Laravel Queues

WORK EXPERIENCE

Sokrio · Software Engineer

2023 – Present | Dhaka, Bangladesh

Multi-tenant Distribution & Supply Chain SaaS · 100+ enterprise clients including Bangladesh Edible Oil Limited (BEOL) · millions of records/day

Projects built:

- ▶ **Sokrio Admin Panel** — Node.js · React.js — full-stack admin interface for enterprise tenant management
- ▶ **Sokrio User Panel** — Node.js · React.js — end-user dashboard with real-time data and reporting
- ▶ **Sokrio Benchmark** — Node.js · React.js (UI) + Python (APIs) — performance benchmarking and analytics platform
- ▶ **Sokrio Modular Tenant APIs** — Laravel — multi-tenant scoped API layer with RBAC and data isolation
- ▶ **Sokrio Mobile APIs** — Laravel — RESTful APIs powering cross-platform mobile applications
- ▶ **Sokrio Management APIs** — Laravel — internal management and operations APIs

Key achievements:

- **Microservices migration:** Architected the migration from a large Laravel + Vue.js monolith to a **microservices architecture** — splitting services, introducing **RabbitMQ** for async messaging, **MongoDB** for the reporting layer, and **Redis** for real-time caching.
- **Frontend modernisation:** Led the migration of the entire frontend from **Vue.js → React.js + Next.js** within **2 months**, introducing a proper module system and component architecture — substantially improving codebase maintainability.
- **Python Benchmark APIs:** Designed and built **data-intensive analytics APIs using Python**, powering the Sokrio Benchmark platform for **performance and KPI tracking** across enterprise clients.
- **24/7 heavy data processing:** Designed **background job pipelines using Laravel Queues** to handle large-volume real-time report generation for **100+ concurrent enterprise tenants** without downtime.
- **Service decomposition:** Built dedicated **reporting service (MongoDB aggregation)**, notification service, and SOP service — decoupling heavy reads from the transactional database.
- **Multi-tenant SaaS:** Built **tenant-scoped data isolation** and **role-based access control (RBAC)** supporting diverse enterprise clients at scale.
- **Database optimisation:** Optimised heavy-load **MySQL and MongoDB queries**; implemented **indexing strategies** for high-throughput APIs handling millions of records.
- **AWS & DevOps:** Monitored application health using **AWS tools**; contributed to **CI/CD pipeline design** and deployment automation across environments.

Stack: Laravel · Node.js · Python · React.js · Next.js · TypeScript · Vue.js · MySQL · MongoDB · Redis · RabbitMQ · Docker · AWS · CI/CD

SoftArch · Junior Software Engineer

2021 – 2022 | Dhaka, Bangladesh

Stack: Laravel · Vue.js · MySQL · Docker · VPS · CI/CD

- **GirlyShopper:** Built a full-featured e-commerce platform with **multi-store inventory management, POS integration**, barcode-based stock tracking, and checkout optimisation.
- **Grocery platform:** Developed a scalable daily goods platform with **real-time inventory tracking, automated restocking**, order scheduling, and multi-store availability management.
- **Conversion features:** Implemented custom shopping features (wishlists, cart, size charts, availability checks) to **improve purchase conversion**.
- **VPS & CI/CD:** Configured and managed **VPS servers**; set up **CI/CD pipelines** for automated testing and deployment.

Am Coders · Software Engineer (Intern → Full-time)

2021 | Dhaka, Bangladesh

Stack: Laravel · Vue.js · Payment Gateways

- **CodeCanyon SaaS product:** Designed and built a complete SaaS product implementing **subscription management, multi-tenant architecture**, and clean API design.
- **Payment integration:** Integrated **payment gateways** and built core billing flows and role-based access control.
- **Promoted intern → full-time** within **1 month** based on performance.

PROJECTS

Point of Sale (POS) System — github.com/komol-chandra/point-of-sell

A lightweight POS system built with Node.js, Express, and React.js. Manages products, customers, and orders via clean RESTful APIs. Designed for small businesses handling inventory and sales efficiently.

EDUCATION

Bachelor of Science — Computer Science & Engineering

Bangladesh University of Business & Technology, Dhaka 2022 – 2025
