PROFILE

Results-driven Software Engineer with **5+ years of experience** building and scaling production systems — from multi-store ecommerce platforms to **large-scale, multi-tenant enterprise software** serving **100+ enterprise clients** and processing **millions of records daily**. Expert in microservices, Laravel, React.js, Node.js, and Python. Track record of leading full-stack delivery, integrating payment systems, collaborating with business stakeholders, owning 24/7 production systems, and mentoring engineers to raise standards across the organisation.

SKILLS

Backend	Laravel (Expert) · Node.js · Python · PHP · RESTful API Design
Frontend	React.js · Next.js · Vue.js · TypeScript · JavaScript
Database	MySQL · MongoDB · Redis · RabbitMQ
DevOps	Docker · AWS · CI/CD · Linux · VPS Management
Architecture	Microservices · Multi-tenant SaaS · Event-driven Systems · RBAC
Payments	Payment Gateway Integration · Subscription Billing · Webhook Handling
Tools	Git · Postman · PHPUnit · Laravel Queues · Telescope · Debugbar

WORK EXPERIENCE

Sokrio · Software Engineer · 2023 – Present | Dhaka, Bangladesh

Multi-tenant Distribution & Supply Chain SaaS · 100+ enterprise clients incl. BEOL · millions of records/day

► Microservices Architecture Migration

- Migrated Laravel + Vue.js monolith → event-driven microservices; extracted Report, Notification & SOP services as independent deployable units
- Introduced RabbitMQ for async inter-service messaging, MongoDB for aggregation-optimised reporting layer, Redis for real-time caching
- Ran monolith and new services in parallel during transition — zero downtime migration strategy across all production environments
- **Impact:** ~20% server load reduction; eliminated downtime during peak data-intensive processing windows

► Payment Gateway Integration

- Designed and integrated secure payment gateway flows for enterprise client billing and subscription management
- Full lifecycle: initiation, webhook handling, failure retries, reconciliation, receipts, and automatic order status updates
- Security: HMAC signature verification, idempotency keys, encrypted transaction logging to prevent duplicate charges
- **Impact:** Zero failed transactions in production; reliable, zero-manual-intervention billing across 100+ enterprise tenants

► Frontend Modernisation — Vue.js v2 → React 18 + Next.js

- Led full frontend rewrite in under 2 months — modular component system, TypeScript throughout, improved state management
- Collaborated directly with business & product stakeholders to re-evaluate UX flows and improve key user journeys during migration
- Established component standards, folder structure conventions, and code review guidelines adopted by the whole engineering team
- **Impact:** 30% improvement in user engagement metrics; faster developer onboarding; substantially improved maintainability

► Python Analytics APIs & 24/7 Background Processing

- Built data-intensive Python APIs powering real-time KPI tracking and performance benchmarking for 100+ enterprise clients
- Laravel Queue pipelines (Redis driver) for high-volume report generation — retry logic, dead-letter queues, chunked jobs

- Queue prioritisation ensures critical jobs never block behind bulk batch processing under sustained peak load
- **Impact:** 99.9%+ uptime for report generation; sub-second response on complex analytics queries across all tenants

► 24/7 Production Support & Business Team Collaboration

- Primary on-call engineer for all six Sokrio applications — triaged and resolved critical client bugs within SLA, typically same-day
- Used Laravel Telescope, AWS CloudWatch, and structured logging to diagnose and fix production issues with minimal disruption
- Technical bridge between engineering and business teams: requirement gathering sessions, spec writing, feature estimation & delivery
- **Impact:** Zero recurring critical incidents; high client satisfaction maintained across 100+ enterprise accounts

► Multi-Tenant SaaS, RBAC & Database Optimisation

- Built full tenant-scoped data isolation and RBAC from scratch — policies, middleware, query-level scoping at every application layer
- Composite indexing, EXPLAIN-based query tuning, N+1 elimination; heavy aggregation reads offloaded to MongoDB
- Decomposed Report, Notification and SOP services — each independently scalable, no read/write contention on primary DB
- **Impact:** Zero cross-tenant data leakage; APIs reliably handle millions of records daily with no manual DB intervention

► DevOps — Docker, AWS & CI/CD

- Containerised all Sokrio services with Docker for consistent local and production environments across the team
- Designed CI/CD pipelines for automated testing and deployment across dev, staging, and production environments
- AWS CloudWatch monitoring and alerting for application health, error rates, and infrastructure metrics
- **Impact:** ~40% reduction in deployment time; zero environment-mismatch incidents post-containerisation

Stack: Laravel · Node.js · Python · React.js · Next.js · TypeScript · Vue.js · MySQL · MongoDB · Redis · RabbitMQ · Docker · AWS · CI/CD

SoftArch · Junior Software Engineer · 2022 – 2023 | Dhaka, Bangladesh

Stack: Laravel · Vue.js · MySQL · Docker · VPS · CI/CD

► GirlyShopper — Multi-Store E-Commerce Platform

- Built full-featured multi-store platform: POS integration, barcode inventory, real-time stock tracking & checkout optimisation
- Integrated payment gateway (card, bKash/Nagad, COD) with webhook listeners for automatic order and payment status updates
- Implemented wishlists, persistent cart, size charts, and real-time availability checks to reduce cart abandonment
- **Impact:** ~60% reduction in manual stock reconciliation; zero payment reconciliation issues; improved repeat purchase rate

► Grocery Delivery Platform

- Scalable daily goods platform: real-time inventory tracking, automated low-stock restocking triggers & advance order scheduling
- Multi-store availability management and high-frequency MySQL query optimisation under peak daily order volumes
- **Impact:** Reliable high-volume fulfilment; significantly reduced out-of-stock incidents and manual stock management overhead

► VPS Infrastructure & CI/CD Pipelines

- Configured and managed Linux VPS servers for multiple production applications — zero-downtime deployment strategy
- Set up automated CI/CD pipelines: lint, test, and deploy on every push to main; containerised stack with Docker
- **Impact:** Consistent, reproducible production releases; eliminated manual deployment errors across all projects

Am Coders · Software Engineer (Intern → Full-time) · 2021 – 2022 | Dhaka, Bangladesh

Stack: Laravel · Vue.js · MySQL · Payment Gateways

► CodeCanyon SaaS Product — Built & Shipped Independently

- Designed and built a complete market-ready SaaS product: multi-tenant architecture, RBAC, REST API, and Vue.js frontend
- Integrated multiple payment gateways with full subscription lifecycle: sign-up, trial, upgrade, downgrade, cancellation & renewal
- Webhook listeners for real-time payment events; HMAC verification and encrypted billing data storage for security
- **Impact:** Product shipped to CodeCanyon marketplace and reached active commercial sales post-launch

► Client Support & Rapid Promotion

- Primary contact for post-launch bug reports from CodeCanyon buyers — triaged and resolved issues typically within 24 hours

- Promoted from intern to full-time Software Engineer within 1 month based on delivery quality and independent ownership
- **Impact:** High marketplace rating maintained; fastest promotion in team — set benchmark for engineering delivery at Am Coders

PROJECTS

Point of Sale (POS) System — github.com/komol-chandra/point-of-sell

Lightweight POS system built with Node.js, Express & React.js — manages products, customers and orders via RESTful APIs. Designed for small businesses handling inventory and daily sales operations efficiently.

EDUCATION

Bachelor of Science — Computer Science & Engineering

Bangladesh University of Business & Technology, Dhaka · 2022 – 2025

Diploma in Engineering — Data Telecommunication & Networking

Feni Computer Institute, Feni · 2016 – 2020
